Validate this instance of SQL Server 2014 by entering the 25-character key from the Microsoft certificate of authenticity or product packaging. You can also specify a free edition of SQL Server, such as Evaluation or Express. Evaluation has the largest set of SQL Server features, as documented in SQL Server Books Online, and is activated with a 180-day expiration. To upgrade from one edition to another, run the Edition Upgrade Wizard.

The screenshot shows the 'Database Engine Configuration' window in the SQL Server 2014 Setup. The window has a title bar 'SQL Server 2014 Setup' and standard window controls. Below the title bar, the main heading is 'Database Engine Configuration' with a subtitle 'Specify Database Engine authentication security mode, administrators and data directories.' On the left is a navigation pane with a list of steps: Product Key, License Terms, Global Rules, Microsoft Update, Product Updates, Install Setup Files, Install Rules, Setup Role, Feature Selection, Feature Rules, Instance Configuration, Server Configuration, Database Engine Configuration (highlighted), Feature Configuration Rules, Ready to Install, Installation Progress, and Complete. The main area has three tabs: 'Server Configuration' (selected), 'Data Directories', and 'FILESTREAM'. Under 'Server Configuration', the instruction is 'Specify the authentication mode and administrators for the Database Engine.' The 'Authentication Mode' section has two radio buttons: 'Windows authentication mode' and 'Mixed Mode (SQL Server authentication and Windows authentication)', with the latter selected. Below this is a label 'Specify the password for the SQL Server system administrator (sa) account.' followed by two text boxes labeled 'Enter password:' and 'Confirm password:'. The 'Specify SQL Server administrators' section has a large empty list box and three buttons: 'Add Current User', 'Add...', and 'Remove'. To the right of the list box is a text box containing the message: 'SQL Server administrators have unrestricted access to the Database Engine.' At the bottom of the window are four buttons: '< Back', 'Next >', 'Cancel', and 'Help'.

The screenshot shows the 'SQL Server 2014 Setup' window, specifically the 'Database Engine Configuration' step. The left sidebar lists various setup options, with 'Database Engine Configuration' currently selected. The main area is divided into three tabs: 'Server Configuration', 'Data Directories', and 'FILESTREAM'. The 'Data Directories' tab is active, displaying a list of directories for configuration. Each entry consists of a label, a text box with a default path, and a browse button (three dots). The paths are as follows:

Directory Type	Path
Data root directory:	C:\Program Files\Microsoft SQL Server\
System database directory:	C:\Program Files\Microsoft SQL Server\MSSQL12.MSSQLSERVER\MSSQL\Data
User database directory:	C:\Default\Data

 - Do nothing and click Next

The screenshot shows the 'SQL Server 2014 Setup' window, specifically the 'Database Engine Configuration' step. The window title bar includes the Microsoft logo and standard window controls. The main heading is 'Database Engine Configuration', followed by the instruction: 'Specify Database Engine authentication security mode, administrators and data directories.' On the left is a vertical list of installation steps, with 'Database Engine Configuration' highlighted. The main area contains three tabs: 'Server Configuration', 'Data Directories', and 'FILESTREAM' (which is selected and has a dashed border). The 'FILESTREAM' tab contains the following options:

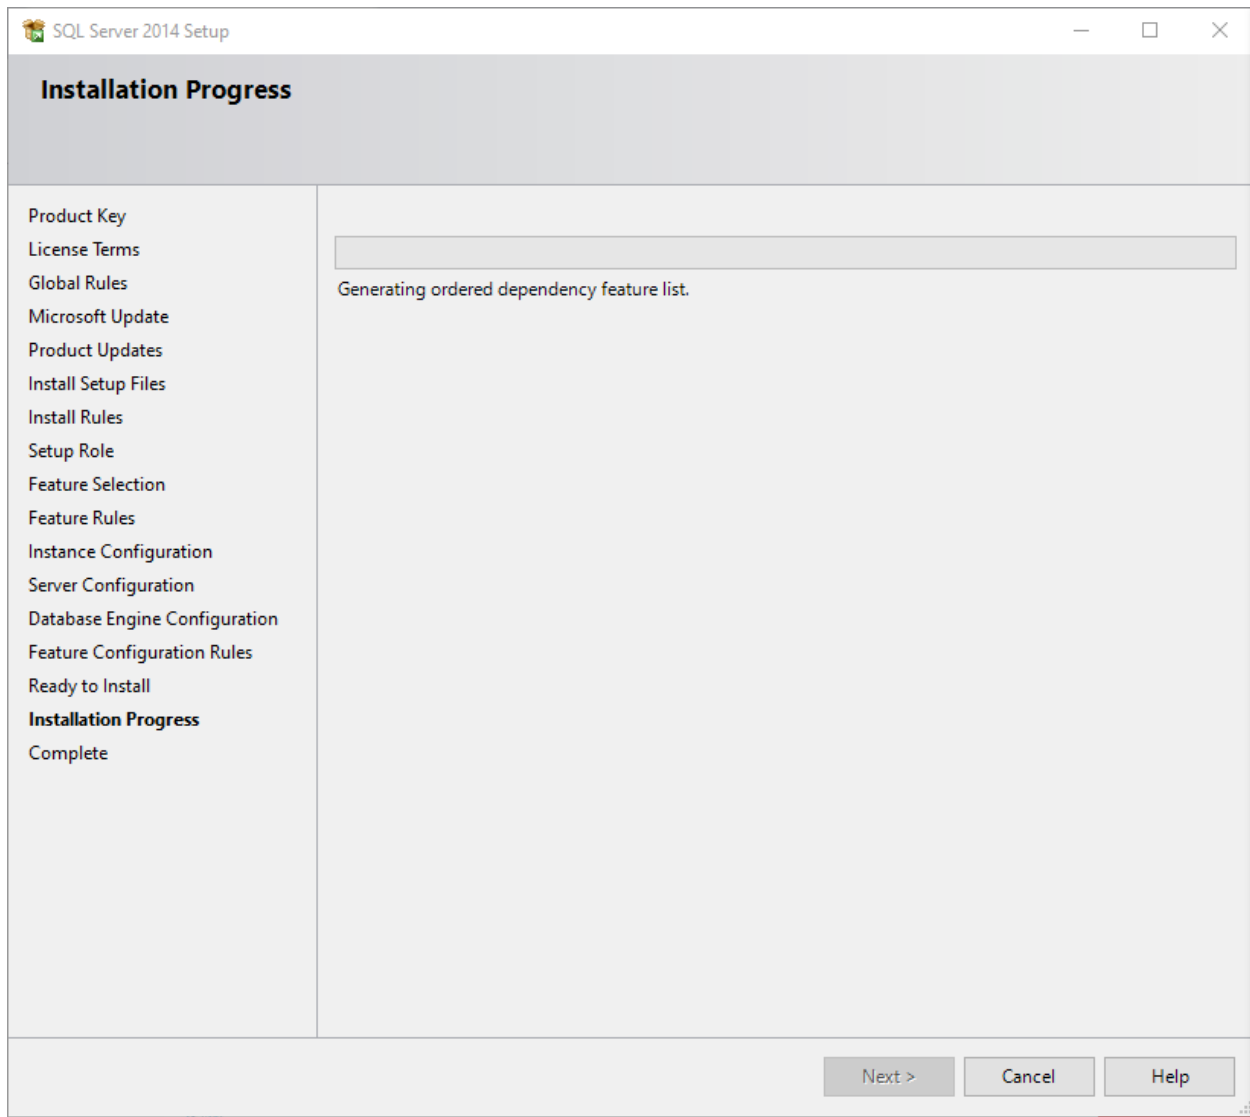

- ☐ Enable FILESTREAM for Transact-SQL access
- ☐ Enable FILESTREAM for file I/O access
- Windows share name:
- ☐ Allow remote clients access to FILESTREAM data

At the bottom of the window are four buttons: '< Back', 'Next >', 'Cancel', and 'Help'.
